DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dako (US 6,823,529) in view of West (US 5,530,966).

Dako discloses a body armor including a front ballistic section (3), a rear ballistic section (4) and a pair of flexible right and left shoulder straps (14a, 14b), which are conventionally sewn to the right and left shoulder section of the front and rear sections as shown in figures 3 and 4. Further, the shoulder straps includes hidden adjustability (15a, 15b) within the body armor as shown in figures 2 and 5. Also, stabilizer tab (29a, 29b) is attached to the body armor as shown in figure 6. Additionally, the front section includes a hidden zipper (19) through which a ballistic panel is inserted as shown in figure 6. However, Dako does not show the body armor having a stabilizer tab being directly sewn to the ballistic panel.

West discloses a body armor including a stabilizer tab (38), which is directly sewn by stitching (37) to the ballistic panel (22), col. 5, lines 44-67 and as shown in figure 2.

Application/Control Number: 10/644,552 Page 3

Art Unit: 3765

It would have been obvious to one skilled in the art at the time the invention was made to secured the tab of Dako directly to the ballistic panel as taught by West, so that the ballistic panel is attached in a fixed position relative to the body armor when the device is worn.

3. Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dako in view of West as applied to claim 1 above, and further in view of Sidebottom (US 6,185,738).

Dako does not show a slit at the bottom of the front section and a cumber band attached to the inside of the armor.

Sidebottom discloses a body armor having a slit (74) at the bottom of a front section which is closable by hook and loop material and has substantially no seams as shown in figure 4. Further, a waist cumber band (84) is attached to the inside of the armor as shown in figure 2.

It would have been obvious to provide the body armor of Dako when viewed with West having a slit at the bottom of the front section as an alternative but equivalent means of inserting a ballistic panel as known in the art. Furthermore, it is obvious that Dako when viewed with West can include a inner cumber band as taught by Sidebottom, so that load of the ballistic panel carried within the armor is easily distributed about the waist.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tejash Patel whose telephone number is (571) 272-4993. The fax phone number for this group is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0861.
